Urban Design at RMIT

Beau Bezra

What is urban design in urban design? What is what? Urban design is an interdisciplinary field that seeks to integrate the physical and social aspects of the built environment in a way that enhances the quality of life for the people who use it. Urban design is not just about designing buildings, but also about shaping the urban spaces where people live, work, and play.

RMIT University is one of the leading institutions in the field of urban design. The university offers a Bachelor of Urban Design degree, which is designed to prepare students for careers in urban design, planning, and related fields. The program is based on a strong foundation in architectural and design principles, and it includes coursework in urban planning, landscape architecture, and other related disciplines.

The program is also closely tied to the real-world needs of the city, with a strong focus on issues such as sustainability, social equity, and economic development. The program includes internships and other opportunities for students to gain practical experience in the field, and it has partnerships with a wide range of organizations and agencies.

Urban design at RMIT is a dynamic and innovative field, and it is one of the most exciting areas of study for students interested in design and urbanism. If you are interested in learning more about urban design, I would recommend contacting the program director for more information.

Gretchen Wilkins

In the face of rapid urban change, RMIT University's Master of Urban Design program aims to equip students with the skills and knowledge to develop innovative strategies for shaping the future of cities. The program is designed to prepare students for careers in urban design, planning, and related fields, and it offers a range of courses that explore the complex issues facing urban environments.

At the undergraduate level, urban design is defined as the collaborative process of planning the setting for the public realm and the private domain. This includes the design of the built environment, as well as the planning of the public realm. At the graduate level, urban design is defined as the art and science of designing the public realm and the private domain in a creative and sustainable way.

The Master of Urban Design at RMIT is an interdisciplinary program that draws on the expertise of architects, planners, landscape architects, and other professionals. The program is designed to be flexible, and students can choose from a range of courses that cover topics such as urban design, planning, and landscape architecture.

The program is also closely tied to the real-world needs of the city, with a strong focus on issues such as sustainability, social equity, and economic development. The program includes internships and other opportunities for students to gain practical experience in the field, and it has partnerships with a wide range of organizations and agencies.

If you are interested in learning more about urban design, I would recommend contacting the program director for more information.

Urban Design at the University of Melbourne

Kim Dowey and Alan March

Urban design education at the University of Melbourne operates at both undergraduate and postgraduate levels. The Bachelor of Urban Design and Planning program is offered at the undergraduate level, while the Master of Urban Design program is offered at the postgraduate level. The programs are designed to provide students with a comprehensive understanding of the urban design process, and they prioritize the development of skills that will enable students to effectively contribute to the shaping of urban environments.

At the undergraduate level, the Bachelor of Urban Design and Planning program provides students with a strong foundation in the theoretical and practical aspects of urban design. The program is designed to equip students with the skills and knowledge to become effective urban designers, and it includes coursework in urban design, planning, landscape architecture, and related disciplines.

At the postgraduate level, the Master of Urban Design program offers a more advanced and specialized education in urban design. The program is designed to provide students with a deeper understanding of the complexities of urban design, and it includes coursework in advanced topics such as urban design theory, urban design practice, and urban design history.

The program is also closely tied to the real-world needs of the city, with a strong focus on issues such as sustainability, social equity, and economic development. The program includes internships and other opportunities for students to gain practical experience in the field, and it has partnerships with a wide range of organizations and agencies.

If you are interested in learning more about urban design, I would recommend contacting the program director for more information.

Views from a client adviser

David Stilp

The Office of Victorian Government (OVG) provides funding support for the Master of Urban Design and Architecture program at the University of Melbourne. OVG is a government agency that funds and manages a range of projects that have a significant impact on the economic and social development of Victoria.

The program is offered in partnership with the City of Geelong, the Victorian Government, and the University of Melbourne. The program is designed to provide students with a comprehensive understanding of the urban design process, and it includes coursework in urban design, planning, landscape architecture, and related disciplines.

The program is also closely tied to the real-world needs of the city, with a strong focus on issues such as sustainability, social equity, and economic development. The program includes internships and other opportunities for students to gain practical experience in the field, and it has partnerships with a wide range of organizations and agencies.

If you are interested in learning more about urban design, I would recommend contacting the program director for more information.

Linking Canberra to the City

Ian Wood Bradley

Canberra is renowned as one of the world’s great planned capitols and has evolved to support a unique identity with world-pound landmarks. The City Plan for Canberra is more than this. As it makes us consider some of the key drivers of our great city, an example of a progressive, inclusive and efficient city is the key to its future. Urban design is fundamental to City Plan. This is its value to the City of the future. It is the heart of City Plan, with a focus on the new Civic area, capital city expansion and an integrated network of towns and cities.

Canberra is one of the world’s great planned capitols. Both the original plan for the Capital and any revision to that plan must be underpinned by the same principles - the need to underpin the community and to provide a focus for the future. In the case of the plan for the Capital, this is evident in the Charter, urban design is defined as "the collaborative process of planning the setting for the public realm and the private domain." The Charter provides a framework for the development of the Capital, and it is the heart of City Plan.

City Plan is the heart of Canberra. It is a statement of values and future aspirations for the Capital. It is a statement of the civic purpose of the Capital and the role of the City and the Capital in responding to the needs of industry, government, communities and the public. City Plan is a statement of the collaborative process of shaping the physical environment and the urban realm, and is the key to the sustainable development of the Capital.
